BEAST MODE. FROM RANGER.

Bold design, like the block-letter grille, muscular haunches, and frame-mounted bumper, gives the new Ranger RAPTOR its imposing stature. An ultra-high-strength frame, giant bash plate and elevated design, allow it to thrive in environments that other trucks wouldn't dare to tread. But the real brawn lies beneath the hood. A muscular bi-turbo engine delivers more top-end power, more bottom-end torque and improved acceleration, while Ford's latest 10-speed auto transmission technology delivers quick gear changes.
